

## Data Science Lab 3

<b>Team nr: 2</b>	<b>Student 1:</b> Åmund Grimstad	<b>IST nr:</b> 1116675
	<b>Student 2:</b> Arthur de Arruda Chau	<b>IST nr:</b> 1116090
	<b>Student 3:</b> Benjamin Raymond Kuhn	<b>IST nr:</b> 1115778
	<b>Student 4:</b> João Rafael Freitas Lourenço	<b>IST nr:</b> 425699

## CLASSIFICATION - DATA PREPARATION

### 1 Traffic Accident Data

#### *Variables Encoding*

Figure 1: Encoding results with different approaches for Traffic Accident Data

#### *Missing Value Imputation*

There are no missing values in the Traffic Accident Dataset.

#### *Outliers Treatment*

Figure 2: Outliers imputation results with different approaches for Traffic Accident Data

## Scaling

Figure 3: Scaling results with different approaches for Traffic Accident Data

## Balancing

Figure 4: Balancing results with different approaches for Traffic Accident Data

**Feature Selection**

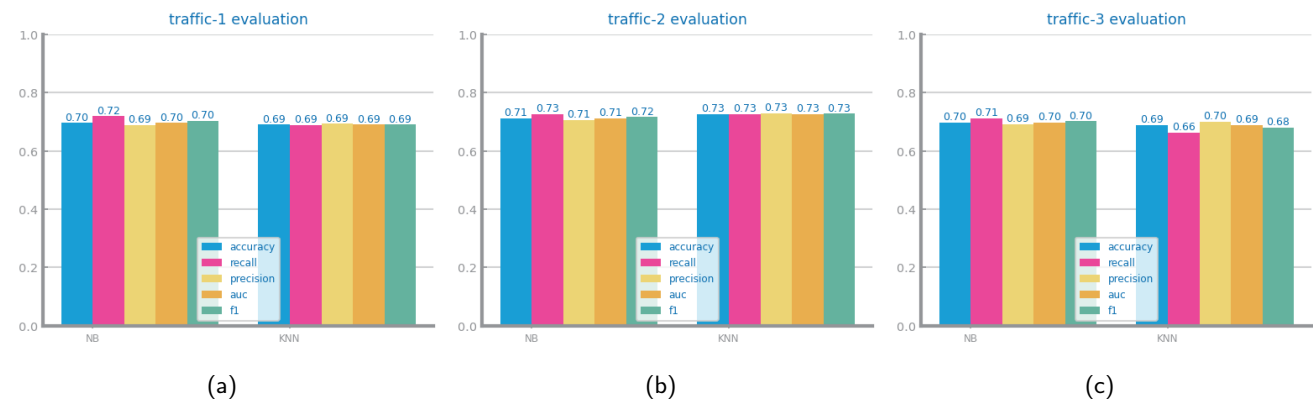

Figure 5: Feature selection results for Traffic Accident Data

Figure 6: Feature selection of redundant variables results with different parameters for Traffic Accident Data

Figure 7: Feature selection of relevant variables results with different parameters for Traffic Accident Data (variance study)

**Feature Extraction (optional)**

Figure 8: Principal components analysis and feature extraction results for Traffic Accident Data

**Additional Feature Generation (if done)**

Figure 9: Feature generation results for Traffic Accident Data

## Best approach

Figure 10: Performance and confusion matrix for best approach for Traffic Accident Data

## 2 Flight Cancellation Data

### Variables Encoding

### Missing Value Imputation

Figure 11: Missing values imputation results with different approaches for Flight Cancellation Data

### Outliers Treatment

Figure 12: Outliers imputation results with different approaches for Flight Cancellation Data

### Scaling

Figure 13: Scaling results with different approaches for Flight Cancellation Data

### Balancing

Figure 14: Balancing results with different approaches for Flight Cancellation Data

### Feature Selection

Figure 15: Feature selection of redundant variables results with different parameters for Flight Cancellation Data

Figure 16: Feature selection of relevant variables results with different parameters for Flight Cancellation Data (variance study)

### ***Feature Extraction (optional)***

Figure 17: Principal components analysis and feature extraction results for Flight Cancellation Data

### ***Additional Feature Generation (if done)***

Figure 18: Feature generation results for Flight Cancellation Data

### ***Best approach***

Figure 19: Performance and confusion matrix for best approach for Flight Cancellation Data
